The global Vacuum Coffee Pot market size is predicted to grow from US\$ 993 million in 2025 to US\$ 1694 million in 2032; it is expected to grow at a CAGR of 8.1% from 2026 to 2032.

Global sales of vacuum coffee pots reached 10 million units in 2025, with an average price of \$94 per unit.

A vacuum coffee pot (also known as a siphon coffee maker) is a full immersion coffee brewing device that utilizes the principle of 'steam expansion-vacuum recirculation': water is poured into the lower chamber and heated to generate steam pressure, pushing the water into the upper chamber to mix with coffee grounds; after the heat is turned off, the lower chamber cools and creates negative pressure, drawing the extracted liquid back through the filter, completing the extraction process. The pot body is typically made of heat-resistant glass with a stainless steel/aluminum stand, with a capacity of 0.3-1.2 L, an extraction temperature of 90-95°C, and a clean taste with rich aroma layers, suitable for coffee lovers who appreciate a ritualistic experience.

Vacuum coffee pots typically consist of a double-walled borosilicate glass body (upper and lower spheres) with a vacuum layer in between for insulation. Some commercial or high-end models use 304/316 stainless steel for the inner liner and are fitted with polypropylene (PP) or phenolic resin handles, lids, and silicone sealing rings. Flame-type pots use ordinary heat-resistant glass for direct heating, while electric-heating types have a die-cast aluminum heating element at the bottom of the lower pot with a built-in heating tube and thermostat.

Raw material cost structure: Borosilicate glass tubes/blanks account for 25-30% of the ex-factory price; stainless steel inner liner and aluminum heating element combined account for 20-25%; heating element, thermostat, and wiring harness account for

10-12%; plastic handles, lids, and silicone seals account for 8-10%; machining, assembly, and labor account for 10%; and testing, packaging, transportation, and channel profits account for 15-20%.
