The global Vacuum Gun market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of % from 2026 to 2032.

A vacuum gun is a power tool for drying and cleaning. It uses compressed air to suction dust such as debris generated during work. Since it has a cylindrical shape with no protrusions, it is resistant to clogging and can generate powerful suction. It is highly convenient because it can be held and worked with one hand.

Some vacuum guns are marketed as blower vacuum guns, which combine a vacuum gun and a blower gun in a single unit and can be used for blowing by changing the direction of the nozzle. Since the nozzle cannot be used alone, it must be used with a high-pressure air hose or air compressor.

United States market for Vacuum Gun is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Vacuum Gun is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
