The global Vacuum Insulation Panel (VIP) market size is predicted to grow from US\$ 2860 million in 2025 to US\$ 9050 million in 2031; it is expected to grow at a CAGR of 21.2% from 2025 to 2031.

A vacuum insulated panel (VIP) is a form of thermal insulation consisting of a nearly gas-tight enclosure surrounding a rigid core, from which the air has been evacuated. Vacuum insulation panel is the thinnest insulation with the most efficient thermal insulation. They have 8 to 10 times lower thermal conductivity than other conventional insulation materials such as rigid foam boards, foam beads or fiber blankets.

The main components of a VIP are inner core, barrier envelope and getters and desiccants. The envelope could either consist of thick metal sheets or multilayer barrier of metalized polymeric layers to provide protection against environmental and handling stresses.

Global Vacuum Insulation Panel (VIP) key players include Panasonic, LG Hausys, Fujian SuperTech, ThermoCor, Porextherm, etc.

Europe is the largest market, with a share about 40%, followed by China, and United States, both have a share over 45 percent.

In terms of product, Fiber Glass is the largest segment, with a share about 75%. And in terms of application, the largest application is Home Appliance, followed by Building Material, Transport, etc.
