A vacuum pick is a tool for picking up an object using a vacuum. It is almost the same in function and use as a product called vacuum tweezers. Several types of parts with different sizes of suction pads, nozzle diameters, and bends are included in the package. Therefore, the optimum combination can be used depending on the size and shape of the flat surface of the object to be suctioned. The pads are made of silicone rubber or other insulating material, making them ideal for work where static electricity is to be avoided.
