The global Vacuum Skin Packaging market size is predicted to grow from US\$ 1547 million in 2025 to US\$ 2398 million in 2031; it is expected to grow at a CAGR of 7.6% from 2025 to 2031.

Vacuum Skin Packaging (VSP) is an outstanding solution for extending the shelf life of perishable food products, including fresh and processed meats, poultry and seafood, ready-to-eat meals, fresh produce and cheese.

The shelf life of a VSP package is nearly double that of a traditional MAP package, and close to four times longer than a stretch-wrapped product. Everyone benefits from longer shelf life: retailers will reduce their shrink, consumers will reduce their food waste

The materials used to do VSP are PET, PE, PP, EPS etc.

Global Vacuum Skin Packaging main players are Sealed Air, Bemis Company, Winpak Ltd., Linpac Packaging, etc. Global top four manufacturers hold a share about 35%. North America is the largest market, with a share over 35%.
