One of the most commonly occurring and least talked about feminine concerns is vaginal odor. Every woman has a unique scent that fluctuates during her menstrual cycle and may change depending upon hormone levels. The scent originates from vaginal secretions and can vary throughout the month.

The vendors are continuously trying to innovate on products to meet the increasing demand for these products and to sustain in the market. Superabsorbent fiber technology and absence of chemicals are anticipated to attract the attention of consumers toward vaginal odor control products such as pantyliners. For instance, the invention of magnetic pantyliners that have a higher capacity to absorb odor than normal pantyliners has made the product popular among women.
