The global Valve Actuators market size is predicted to grow from US\$ 17160 million in 2025 to US\$ 21460 million in 2031; it is expected to grow at a CAGR of 3.8% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

A valve actuator is a mechanism valve used to open and close. Manually operated valves require someone to be present, using a direct or gear mechanism connected to the valve stem to adjust them. Electric actuators use air pressure, hydraulic pressure, or electricity to allow remote adjustment of the valve or allow rapid operation of large valves. Electric valve actuators may be the final element of an automatic control loop that automatically adjusts certain flow rates, liquid levels, or other processes. The actuator may only be used to open and close the valve, or it may allow intermediate positioning; some valve actuators include switches or other means to remotely indicate the position of the valve.

Key global players of Valve Actuator include Emerson, Rotork, Belimo, Siemens, AUMA, etc. Belimo is the biggest manufacturer with a share about 8%. The top 3 manufacturers of the world are Belimo, Emerson, Johnson Controls. In global, Asia-Pacific is the largest market. China makes up over a quarter of the global market share.
