Abstracts

The global Vegan Food market size is predicted to grow from US\$ 13590 million in 2025 to US\$ 18850 million in 2031; it is expected to grow at a CAGR of 5.6% from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

Vegan Food is a type of vegetarian diet that excludes meat, eggs, dairy products and all other animal-derived ingredients. Many vegans also excludes foods that are processed using animal products, such as refined white sugar and some wines.

Growing awareness about animal health and animal cruelty in the food industry has been encouraging people to shift from animal-based to plant-based food products. Increasing awareness about the benefits of following vegan diet is the key factor responsible for the growth of this market.
