The global Vegan Wax market size is predicted to grow from US\$ 1155 million in 2025 to US\$ 1409 million in 2031; it is expected to grow at a CAGR of 3.4% from 2025 to 2031.

Vegan Wax is a blend of hydrocarbons and fatty esters (an ester of a fatty alcohol and a fatty acid). These vegan waxes are derived from leaves, peels and fruits of different plants or are separated from plant oils by de-waxing. This process involves physical separation and no chemical reactions are involved.

Vegan wax is growing in popularity as it is used in a variety of products such as lipstick, lip balm, foundation, mascara, and hair wax. Another driver of the vegan wax market is the use of vegan wax in the medical industry and cosmetics to reduce stretch marks and wrinkles. This factor has also contributed to the growth of vegan wax due to rising personal care consumption, rising disposable income and increasing number of young people who are more concerned about personal grooming, personal care and cosmetics.
