Vehicle Sideslip Tester is a diagnostic device used to measure the lateral movement, or 'sideslip,' of a vehicle's wheels as it moves in a straight line. This test helps determine whether the wheels are correctly aligned, which is crucial for safe handling, tire wear, and fuel efficiency. By rolling the vehicle over a sensor-equipped platform, the tester detects any deviation from the intended path, indicating misalignment or suspension issues. Sideslip testing is commonly performed during routine vehicle inspections and is especially important for ensuring stability and performance in high-speed or commercial vehicles.
