A Trailer Hitch (or tow bar) is a device attached to the chassis of a vehicle for towing, or a towbar to an aircraft nose gear.

Tow hitches are known as trailer hitches in North America, but the purpose of use is the same. Trailer hitches usually have two primary configurations, one is the fixed drawbar type and the other is the receiver type. The receiver type includes parts that mount to the vehicle's frame and also consist of an opening that is rearward facing which takes cargo carriers, hitch racks, detachable ball mounts or other hitch accessories. On the other hand fixed drawbar hitches are built as one piece and consist of a hole that is integrated and these hitches are not aftermarket hitch accessories compatible.
