Vanillin methyl ether, also known as veratraldehyde, is an organic compound. It is a methylated derivative of vanillin with a sweet vanilla aroma and is widely used in food, spices, and cosmetics industries as a flavor additive. Vanillin methyl ether usually exists in the form of white crystals or colorless liquids and is soluble in organic solvents, but has a low solubility in water. Its aroma is relatively soft and long-lasting, so it is often used as a raw material for spices, especially in chocolate, candy, perfume and various condiments. In addition, vanillin methyl ether is also used in chemical synthesis as an intermediate for the synthesis of other organic compounds.
