However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Veterinary Computed Tomography (CT) Scanners. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Veterinary Computed Tomography (CT) Scanners market.

According to Our PET Supplies Research Center, the global pet industry reached \$ 261 billion in 2022, a year-on-year increase of 11.3%. The United States gains the highest pet penetration rate and becomes the largest pet market. According to the American Pet Products Association (APPA), 66% of American households keep pets, and the total industry sales was about US\$136.8 billion, an increase of 10.8% over 2021. According to IVH, the German pet products industry association, the number of pets in Germany reached 33.4 million in 2022, with a total turnover of nearly ?6.5 billion. The 2023 China Pet Industry Trend Insight White Paper released by JD shows that the market size of

the four major pet physical commodities is increasing year by year: pet supplies account for 45%, pet staple food accounts for nearly 35%, pet snacks account for 12%, and pet medicine and health care account for 56%. Emerging trends in the veterinary computed tomography scanner market suggest that the growing demand for pet care and the growing critical diseases amongst animals are the factors that propel the sales of veterinary computed tomography scanners. An animal CT scan involves a thin cross-section of the head that is known as a tomographic slice. This is examined through a straight ray beam that penetrates more than the radiology and ultrasound tests.
