The global Veterinary Diagnostic Imaging market size is predicted to grow from US\$ 1823 million in 2025 to US\$ 2589 million in 2031; it is expected to grow at a CAGR of 6.0% from 2025 to 2031.

Veterinary Diagnostic Imaging refers to the use of various imaging technologies to diagnose diseases, injuries, or conditions in animals. This includes methods such as X-rays, ultrasound, MRI (Magnetic Resonance Imaging), and CT (Computed Tomography) scans. These techniques allow veterinarians to non-invasively visualize the internal structures of animals, aiding in the accurate diagnosis and treatment planning for a wide range of medical issues, from bone fractures to soft tissue abnormalities and organ diseases.

The Veterinary Diagnostic Imaging market is driven by the increasing pet ownership and rising awareness of animal healthcare. Pet owners are more willing to invest in advanced medical treatments, which boosts the demand for diagnostic imaging technologies. Additionally, the growing prevalence of chronic diseases, such as cancer and arthritis in pets, has led to an increased need for early and accurate diagnosis. Technological advancements in imaging equipment, such as portable devices and 3D imaging, also contribute to market growth by improving the accessibility and accuracy of diagnostics for both small and large animals.

Despite the growing demand, the Veterinary Diagnostic Imaging market faces challenges, particularly high costs associated with advanced imaging equipment and procedures. Smaller veterinary clinics and rural practices may struggle to afford such

technologies, limiting their adoption. Additionally, the need for skilled personnel to operate these sophisticated machines and interpret the results poses another hurdle, as there is a shortage of trained veterinary radiologists. Regulatory and safety concerns, particularly regarding the use of radiation in diagnostic imaging, add complexity to market expansion.

The major players in global Veterinary Diagnostic Imaging market include GE, IDEXX, Esaote, etc. North America and Europe are main markets, they occupy about 75% of the global market.
