Lighting for a Veterinary clinic or hospital facility must be very specific to meet both the needs of physicians, staff and their animal patients. With adjustable light levels and dimming capabilities, the physician can put animals at ease during the examination. High-quality lighting is imperative when conducting a veterinary examination or in a surgery. Veterinary exam lights should produce accurate color temperature and rendering, have no heat radiation toward the patient and provide a beam angle and adaptable arm that allow it to be positioned correctly and without drifting.
