Video Doorbell Intercom System which is also named as the video door-phone or video door entry devices and equipment, is a stand-alone intercom system used to manage calls made at the entrance to a building with access controlled by audio/visual communication between the inside and outside. The main feature of video door entry is that it enables the person indoors to identify the visitor and, if (and only if) they wish, engage in conversation and/or open the door to allow access to the person calling. In our report, we only discussed the door entry video intercoms.

The Video Doorbell Intercom System market has experienced significant growth over the past few years, driven by increasing security concerns, technological advancements, and the rising demand for smart home solutions. A Video Doorbell Intercom System or doorbell phone is a vital communication device that allows two-way communication between residents and visitors, enhancing the security and convenience of homes, offices, and buildings.

The Video Doorbell Intercom System market serves a variety of applications, with the largest market share coming from residential use. Residential buildings, including houses, apartments, and villas, make up the dominant segment of the market. With increasing concerns over home security, more homeowners are opting for doorphones to screen visitors and ensure their safety. The popularity of video intercoms in residential settings is particularly notable, as homeowners seek advanced features that offer both convenience and enhanced security.

The Asia-Pacific region is the largest consumer market for Video Doorbell Intercom Systems, accounting for over 50% of the global market share. This dominance can be attributed to the rapid urbanization, growing middle class, and increasing demand for smart home products in countries such as China, India, Japan, and South Korea. In these countries, the adoption of Video Doorbell Intercom Systems has risen significantly, driven by the need for enhanced security solutions in residential and commercial buildings.

The rise of smart cities and the increasing integration of advanced technologies in homes and buildings have further boosted the demand for video intercoms in the region. Additionally, the Asia-Pacific region is witnessing significant infrastructure development, particularly in residential and commercial real estate, which further contributes to the growth of the Video Doorbell Intercom System market.
