Video Management Platforms (VMS) are software-based systems used to collect, manage, store, and analyze video streams from multiple surveillance sources such as IP cameras, edge devices, and sensors. These platforms?offered by providers like Genetec, Milestone Systems, and Hikvision?enable centralized control of video feeds, real-time monitoring, playback, event detection, and integration with analytics (e.g., object detection, facial recognition). Modern VMS solutions increasingly incorporate AI-driven capabilities, cloud deployment, and open-platform architectures to support applications across security, smart cities, retail analytics, transportation, and critical infrastructure. The pricing of Video Management Platforms (VMS) varies by scale and deployment: entry-level systems typically cost \$100?\$500 per camera (one-time license), while enterprise on-premise solutions can reach \$10,000 to \$500,000+ per system; cloud-based VMS (VSaaS) usually charges \$5?\$30 per camera per month, with AI analytics add-ons increasing costs to \$10?\$100 per camera per month, and large smart city or government deployments can exceed \$1 million per project depending on system complexity and integration level.
