Video translation service providers accurately translate video files. The most common services provided are video-to-text, where a video file from one language is translated and transcribed to text in a different language, and “voice-over,” where audio from one language is translated and recorded into audio in a different language. Multimedia localization services frequently provide many of the same solutions as video translators, including subtitles. Providers translate between numerous languages and typically can guarantee a level of confidentiality when necessary.

The global Video Translation Service market size is projected to grow from US\$ 7987.4 million in 2023 to US\$ 12780 million in 2030; it is expected to grow at a CAGR of 7.0% from 2024 to 2030.
