Flavored water is non-alcoholic bottled drinking water that is rich in mineral and has flavor. Flavored water comes in three varieties—still, sparkling, and functional water infused with natural flavors. Sparkling flavored water combines carbonation with additional minerals, whereas functional flavored water has extra ingredients such as protein, vitamins, herbs, botanicals, and alkaloids that provide health benefits. The supplemental elements in flavored water help to boost the immune system, balance the pH and rejuvenate the body. Flavored water has a distinctly clear and crisp flavor that gives customers an enhanced experience.
