The global VOCs Adsorption Resin market size is predicted to grow from US\$ 43.83 million in 2025 to US\$ 81.61 million in 2032; it is expected to grow at a CAGR of 9.3% from 2026 to 2032.

In 2025, global sales volume of VOCs Adsorption Resin was approximately 2,800 tons, with an average global market price of about USD 16/kg. The gross margin of major manufacturers in the industry was around 32%-48%.

VOCs Adsorption Resin is a functional adsorbent material used for industrial organic waste gas treatment. It adsorbs, concentrates and separates volatile organic compounds such as alkanes, halogenated hydrocarbons, aromatic hydrocarbons, alcohols, ketones and esters through its macroporous structure, high specific surface area and surface adsorption properties. The product is generally based on spherical macroporous resin or hyper-crosslinked polymer resin, with good adsorption capacity, mechanical strength, solvent resistance and regeneration performance. It can be regenerated through steam, hot gas or vacuum desorption, and is suitable for VOCs purification, solvent recovery and adsorption concentration applications.

The upstream raw materials of VOCs Adsorption Resin mainly include styrene, divinylbenzene, functional monomers, porogens, crosslinking agents, initiators and resin post-treatment additives. The midstream segment covers the production of macroporous adsorbent resin, hyper-crosslinked adsorbent resin and related adsorbent materials, with core value concentrated in pore structure design, adsorption selectivity, desorption efficiency and cycle life control. The downstream applications mainly include medicine manufacturing, coating and printing, petrochemical, electronic manufacturing, rubber and plastic industries, where the product is used for organic waste gas emission

compliance and high-value solvent recovery.

United States market for VOCs Adsorption Resin is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for VOCs Adsorption Resin is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

Europe market for VOCs Adsorption Resin is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
