According to this study, the global Voice Over Internet Protocol market size will reach US\$ 115900 million by 2031.

Voice over Internet Protocol (VoIP), is a technology that allows you to make voice calls using a broadband Internet connection instead of a regular (or analog) phone line. Some VoIP services may only allow you to call other people using the same service, but others may allow you to call anyone who has a telephone number - including local, long distance, mobile, and international numbers. Also, while some VoIP services only work over your computer or a special VoIP phone, other services allow you to use a traditional phone connected to a VoIP adapter.

The major Global VoIP players are NTT, Comcast, Orange, KT, Charter, Microsoft (Skype), Cablevision, Verizon, AT & T, Vonage, Cox, Telmex, Time Warner Cable, Numericable-SFR, Rogers, Sprint, Liberty Global, KDDI, TalkTalk, Shaw Communications, 8X8, Ring Central and Mitel.
