Abstracts

According to this study, the global Volumetric Rendering Platform (VRP) market size will reach US\$ 144 million by 2031.

The VRP (Volumetric Rendering Platform) of Singular Health Group is its core proprietary technology. It uses patented technology and algorithms to accurately convert standard 2D medical images (such as CT, MRI, and PET scans) into volumetric 3D models. It accepts industry - standard input formats like NIfTI (.nii), DICOM (.dcm), near - raw raster data (.nrrd), and JPEG 2000, and outputs in formats including NIfTI (.nii), DICOM (.dcm), MP4, PNG, JPEG, STL, and OBJ. It was initially developed in 2017 and has been continuously improved. By 2021, it has been highly optimized to work on mobile phones and standalone VR headsets, enabling 100% local rendering of medical images in less than 60 seconds. It serves as the foundation for software solutions such as the 3D DICOM viewer, 3D DICOM VSP, and GeoVR. It is used in surgical planning, mineral resources exploration, and production, helping medical professionals better visualize patient imaging and aiding in more accurate diagnoses and treatment planning.
