Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

Wading pants isolate your legs from the water so your ankles and calves don't ache in cold water. And because wading pants don't absorb water, they won't slip and sag like soaked jeans. Wading pants made of neoprene material keep you warm and are especially useful when fishing in cold mountain streams or rivers. However, there are also waders made of breathable material that are more comfortable when fishing in warm water in summer.
