According to our LPI (LP Information) latest study, the global Wafer Sorting System market size was valued at US\$ 670.1 million in 2023. With growing demand in downstream market, the Wafer Sorting System is forecast to a readjusted size of US\$ 1072.5 million by 2030 with a CAGR of 7.0% during review period.

The research report highlights the growth potential of the global Wafer Sorting System market. Wafer Sorting System are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Wafer Sorting System. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Wafer Sorting System market.

Wafer sort is a crucial process in semiconductor wafer processing facilities. It is the first testing stop for completed wafers. The test results provide valuable feedback to multiple departments – production control, wafer fabrication, product engineering and quality control. If yield results are low then changes have to be made. If yields are high or as expected the process is in control and no changes are required.

Following a strong growth of 26.2 percent in the year 2021, WSTS revised it down to a single digit growth for the worldwide semiconductor market in 2022 with a total size of US\$580 billion, up 4.4 percent. WSTS lowered growth estimation as inflation rises and end markets seeing weaker demand, especially those exposed to consumer spending. While some major categories are still double-digit year-over-year growth in 2022, led by

Analog with 20.8 percent, Sensors with 16.3 percent, and Logic with 14.5 percent growth. Memory declined with 12.6 percent year over year. In 2022, all geographical regions showed double-digit growth except Asia Pacific. The largest region, Asia Pacific, declined 2.0 percent. Sales in the Americas were US\$142.1 billion, up 17.0% year-on-year, sales in Europe were US\$53.8 billion, up 12.6% year-on-year, and sales in Japan were US\$48.1 billion, up 10.0% year-on-year. However, sales in the largest Asia-Pacific region were US\$336.2 billion, down 2.0% year-on-year.
