These baths support physical rehabilitation, hydrotherapy, and improved daily living comfort.

The industrial chain includes upstream suppliers of fiberglass panels, acrylic sheets, stainless fixtures, pumps, heaters, valves, and electronic-control modules. Midstream manufacturers perform molding, reinforcement, plumbing integration, door sealing assembly, and leak testing. Downstream users include hospitals, rehabilitation centers, elderly-care facilities, home-care providers, and residential consumers requiring assisted bathing.

United States market for Walk-In Rehabilitation Bath is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.
