The global Wall-mounted Charging Pile market size is predicted to grow from US\$ 14680 million in 2025 to US\$ 327020 million in 2031; it is expected to grow at a CAGR of 67.7% from 2025 to 2031.

A wall-mounted charging pile, also known as a wallbox or wall-mounted charging station, is an electric vehicle (EV) charging device that is installed on a wall surface. It is designed to provide a convenient and efficient charging solution for electric vehicles in residential, commercial, and public settings. The wall-mounted charging pile typically consists of a charging module, a cable or connector, and relevant control and safety systems.

Global EV sales continued strong. A total of 10.5 million new BEVs and PHEVs were delivered during 2022, an increase of +55 % compared to 2021. China and Europe emerged as the main drivers of strong growth in global EV sales. In 2022, the production and sales of new energy vehicles in China reach 7.0 million and 6.8 million respectively, a year-on-year increase of 96.9% and 93.4%, with a market share of 25.6%. The production and sales of new energy vehicles have ranked first in the world for eight consecutive years. Among them, the sales volume of pure electric vehicles was 5.365 million, a year-on-year increase of 81.6%. In 2022, sales of pure electric vehicles in Europe will increase by 29% year-on-year to 1.58 million. The market for wall-mounted charging pile is growing with the proliferation of electric vehicles and the development of charging infrastructure. Supportive government policies, investments by businesses, and consumer preference for eco-friendly modes of transportation are factors driving the growth of the market. At the same time, with the continuous

advancement of technology and the intensification of competition, the design and function of wall-mounted charging piles are also constantly improving to meet the changing market needs.
