The global Wall-mounted Surveillance Bracket market size is predicted to grow from US\$ 51.36 million in 2025 to US\$ 79.81 million in 2032; it is expected to grow at a CAGR of 6.5% from 2026 to 2032.

In 2025, global sales of wall-mounted surveillance brackets reached 3.5 million units, with an average selling price of \$15 per unit. Wall-mounted surveillance brackets are devices used to support and install surveillance cameras, typically mounted on walls or pillars, ensuring the camera can be fixed in the desired position and achieve the best viewing angle. These brackets utilize high-strength materials and corrosion-resistant designs, ensuring stable use over long periods, and are widely used in security monitoring systems in commercial, industrial, residential, and public places. Total production capacity was 5 million units, with a gross profit margin of approximately 20%. The upstream raw materials for wall-mounted surveillance brackets mainly include steel, aluminum alloys, plastics, and screws, which typically come from large metal processing plants, plastic manufacturers, and hardware suppliers. Downstream demand mainly comes from security companies, surveillance equipment manufacturers, and system integrators. Driven by the development of smart city construction and the security industry, the demand for wall-mounted surveillance camera brackets continues to grow. With the increasing global emphasis on security monitoring and the growing security needs in emerging markets, the market prospects for wall-mounted surveillance camera brackets are broad, with even higher market demand expected in the future, especially in large-scale security systems, smart buildings, and urban monitoring projects, where business opportunities will further expand.
