The global Warm Air Blowers market size is predicted to grow from US\$ 3589 million in 2025 to US\$ 4964 million in 2032; it is expected to grow at a CAGR of 4.7% from 2026 to 2032.

Warm air blowers are space heating devices that heat air using electric heating elements or fuel heat exchange, then blow it out by a fan. Broadly speaking, they encompass various forms such as household heating fans, bathroom exhaust fans, tower heaters, industrial hot air blowers, and air curtains.

Typical product forms include: portable household heaters with resistance or PTC ceramic cores, featuring multiple heat and fan modes, digital thermostats, and anti-tipping protection; high-end heaters characterized by air-guided towers and bladeless structures; and bathroom heaters integrating exhaust and heating functions, installed in the ceiling, using a DC motor and PTC heater to achieve dehumidification, ventilation, and instant heating. In industrial and commercial applications, they are further subdivided by energy source, including fuel-fired heaters, electric heaters, and infrared heaters, used for heating spaces such as construction sites, warehouses, and tents.

In 2025, global Warm Air Blowers sale reached approximately 5,167 K Units, with an average global market price of around 710 US\$/Unit. Production capacity reached 6,000 K Units, with a gross profit margin of approximately 30%.

For home heating and year-round comfort, leading brands like Midea, Gree, Haier, and Xiaomi are at the forefront, offering tower heaters, convection baseboard heaters, and small heaters with fan modes, covering bedrooms, living rooms, and offices. Brands like Dyson and German Pool combine heating, air purification, and fan functions, emphasizing year-round use and stylish design, transforming heaters from seasonal necessities to everyday comfort appliances. In bathrooms and specific functional

spaces, Panasonic's WhisperWarm bathroom exhaust heater in North America and Japan combines dehumidification, ventilation, and instant heating, addressing pain points like temperature fluctuations, mold control, and health risks in winter bathrooms. This segment has attracted more attention from bathroom and renovation channels. In industrial and commercial building heating and energy-efficient access control, companies like Dantherm, Vulcanic, and Stavoklima focus on factories, warehouses, stadiums, and logistics hubs, using industrial heaters, air curtains, and thermal curtains to achieve large-space heating, prevent cold air intrusion, and control energy consumption.
