Wastewater odor control solution is a comprehensive treatment plan designed to address malodorous gases generated during industrial wastewater treatment. This solution effectively removes odorous gases emitted from wastewater treatment systems, such as aeration tanks, sedimentation tanks, and sludge treatment areas, through physical, chemical, or biological methods. Common methods include chemical absorption, biofiltration, activated carbon adsorption, and ion exchange. These techniques have their own advantages and disadvantages, and the specific choice depends on factors such as wastewater composition, odor concentration, and treatment costs. An effective wastewater odor control solution not only enhances corporate image but also reduces environmental pollution, contributing to sustainable development.
