## Abstracts

The global Water Activity Measurement market size is predicted to grow from US\$ 31.48 million in 2025 to US\$ 42.46 million in 2032; it is expected to grow at a CAGR of 4.5% from 2026 to 2032.

In 2024, global Water Activity Measurement production reached approximately 11,433 units, with an average global market price of around US\$ 2,718 per unit.

Water Activity Meter (Aw for short, also known as water activity, water activity) mainly reflects the amount of free water in the food in a balanced state, the stability of the food and the possibility of microbial reproduction and what can cause changes in food quality. Chemical, enzymatic, and physical changes are often used to measure the ability of microorganisms to tolerate dryness. By measuring the water activity of food and choosing reasonable packaging and storage methods, the use of preservatives can be reduced, and the shelf life of food, grain, fruits and vegetables can be judged.

The Water Activity Measurement market is poised for steady growth, driven by technological advancements, regulatory requirements, and increasing awareness of product quality and safety. Key trends such as portable devices, IoT integration, and sustainability will shape the future of the market. However, addressing challenges like high costs and technical complexity will be crucial for broader adoption.

The North America Water Activity Measurement production value was US\$ 10.84 million in 2024 and it will be US\$ 13.98 Million in 2031, with a growth rate 3.79% from 2025 to 2031. Factors that support this trend are the rising regulatory requirements for food safety, the pharmaceutical industry, and material science research, along with stability testing.

The major global manufacturers of Water Activity Measurement include AquaLab (Addium), Shenzhen Guanya, Novasina, Rotronic (Process Sensing Technologies), SIBATA SCIENTIFIC TECHNOLOGY, Steroglass, Wisdom Shanghai Instrument, Driesen + Kern GmbH, Freund Corporation, humimeter (Schaller Messtechnik), CapPlus Technologies, Lighttells, Zhejiang NADE Scientific Instrument, Qingdao Realltech Instruments, Beijing Beidouxing Technology, Guangzhou Lantai Instrument, Wuxi Huake Instrument, Zhejiang TAILIN Bioengineering, etc. In 2024, the world's top five vendors accounted for approximately 73.88% of the revenue.

In Water Activity Measurement market, the Food Industry holds an important share, and it is expected to reach a volume of 6,804 units by 2031, at a CAGR of 5.41% during 2025 and 2031. The Pharmaceutical Industry is expected to grow at the fastest rate during the forecast period due to increasing regulatory requirements and demand for precise moisture control in drug formulation.

North America dominates the market for water activity instrumentation due to severe food safety standards, advanced pharma production, and strong R&D spending. The USA and Canada are the key contributors, and they report good demand from the food industry and biotech industries. Availability of leading-line manufacturers and technological advances in accuracy instrumentation also fuel the growth of the market. Food safety and drug quality control initiatives from governments are propelling market adoption in the region.

Europe is a stronghold region, with Germany, the UK, and France leading pharmaceuticals and food production. The requirements for drug stability testing and food safety across the EU drive demand for water activity equipment. Market also benefits from advancing automatic test technology and additional funding in research lab facilities. Demand is further driven by rising interest in natural preservatives and clean-label foods, where better analysis of water activity is required for product integrity.

Asia-Pacific is anticipated to register the fastest growth, driven by increasing industrialization, expanding food and pharmaceutical sectors, and growing regulatory enforcement. China, India, Japan, and South Korea are major contributors, with heightened demand from food exporters, generic drug manufacturers, and research institutes.
