Water-based high-temperature paint is a paint that uses water as a solvent and has high-temperature resistance. It is usually composed of high-temperature stable resin, pigments, fillers and additives. Water-based high-temperature coatings can be used in high-temperature environments and are heat-resistant, oxidation-resistant, and corrosion-resistant. It can be applied to the surface coating of various high-temperature equipment and structures, such as boilers, furnaces, pipes, chimneys, etc. Water-based high-temperature coatings not only have good anti-corrosion properties, but also provide beautiful decorative effects. They are also environmentally friendly, do not contain harmful substances, and meet environmental protection requirements.
