The global Water-based Lamination Adhesives market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of % from 2026 to 2032.

Water-based lamination adhesives are water-based adhesives that usually consist of water, polymer emulsions, and additives. They are primarily used to bond laminates of different materials (e.g., wood, cardboard, metal, plastic, etc.) together to form composites with strength and stability. After being applied to the surface of the substrate, these water-based adhesives are cured by evaporating water or by heating to form a bonding layer with excellent properties. Water-based laminated adhesives are widely used in furniture manufacturing, building decoration, packaging materials and other fields due to their low volatile organic compound (VOC) content, good environmental friendliness and high safety.

United States market for Water-based Lamination Adhesives is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
