Water-based leave-in conditioners are hair care products that are primarily composed of water as the main ingredient. These conditioners are designed to be applied to the hair and left in without rinsing, providing hydration, nourishment, and detangling benefits. They typically contain a blend of moisturizing ingredients such as humectants (e.g., glycerin), natural oils, botanical extracts, and conditioning agents like panthenol or

proteins. Water-based leave-in conditioners are lightweight and often suitable for all hair types, including fine or oily hair, as they do not weigh the hair down or leave a heavy residue. They can help improve hair manageability, reduce frizz, enhance shine, and promote overall hair health.
