Water-based Mold Release Agents are chemical substances formulated to prevent adhesion between a molded part and the surface of the mold during the manufacturing process. These agents are environmentally friendly alternatives to solvent-based release agents and are designed to be dispersed in water for easy application and reduced environmental impact. They provide a thin, uniform film on the mold surface, allowing for easy release of the molded part without damaging the mold or affecting the quality of the finished product.

The global Water-Based Mold Release Agents market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of % from 2024 to 2030.
