Water-based PVDF coating is a water-based coating with polyvinylidene fluoride (PVDF) as the main component. PVDF is a high-performance fluoroplastic with excellent properties such as weather resistance, chemical corrosion resistance and high temperature resistance. Water-based PVDF coating uses water as the solvent, reducing the use of organic solvents. It is environmentally friendly, non-toxic, odorless, and meets modern environmental protection requirements. Water-based PVDF coatings are commonly used in the coating of metal, construction, glass and other materials to provide protective, beautiful and durable coating effects.

The global Water-based PVDF Coating market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of % from 2024 to 2030.
