Abstracts

The global Water-based Rubber Asphalt Waterproof Coating market size is predicted to grow from US\$ 992 million in 2025 to US\$ 1308 million in 2032; it is expected to grow at a CAGR of 4.1% from 2026 to 2032.

Water-based rubberized asphalt waterproof coating is an environmentally friendly, single-component waterproof coating made from synthetic polymer emulsion-modified emulsified asphalt as the base material, with added additives. It boasts advantages such as being water-based and environmentally friendly, having strong adhesion, high elongation, and ease of application (brushing or spraying). It is particularly suitable for use in combination with asphalt waterproof membranes, effectively enhancing the performance of 'coating + membrane' composite waterproofing systems, and is commonly used in basements, roofs, and other engineering projects.
