Water Blocking Swellable Tape is a specialized material designed to prevent water ingress in various applications, particularly in cable and pipeline systems. It is composed of a substrate, such as non-woven fabric or yarn, impregnated with superabsorbent polymers (SAPs). These polymers can absorb and retain large quantities of water, causing the tape to swell and create a watertight barrier. This property makes it highly effective in protecting electrical cables, fiber optic cables, and other sensitive infrastructure from moisture damage, enhancing the longevity and reliability of these systems.
