Abstracts

According to this study, the global Water Jet Cutting Services market size will reach US$ 1949 million by 2031.

Water Jet Cutting Services, also known as waterjet machining, utilize high - pressure streams of water (often mixed with abrasives) to cut through various materials with precision. Unlike laser or plasma cutting, waterjet cutting is a cold process, avoiding heat - induced material distortion or thermal damage. A pump generates water pressure up to 400–600 MPa (58,000–87,000 psi), which is forced through a small nozzle (typically 0.1–0.8 mm in diameter) to form a high - velocity jet. For harder materials, abrasives (like garnet, aluminum oxide) are added to the water stream, acting as cutting particles.

United States market for Water Jet Cutting Services is estimated to increase from US$ million in 2024 to US$ million by 2031, at a CAGR of % from 2025 through 2031.

China market for Water Jet Cutting Services is estimated to increase from US$ million in 2024 to US$ million by 2031, at a CAGR of % from 2025 through 2031.

Europe market for Water Jet Cutting Services is estimated to increase from US$ million in 2024 to US$ million by 2031, at a CAGR of % from 2025 through 2031.

Global key Water Jet Cutting Services players cover East Valley Precision, Xometry, Aqua Jet, LLC, Pesznecker Brothers Inc., West Coast Waterjet, etc. In terms of revenue, the global two largest companies occupied for a share nearly % in 2024.
