Water and oil resistant coating agents, typically solutions of dissolved fluoropolymers, are applied to surfaces to impart water- and oil-repellent properties. Easily applied by brushing or dipping, these agents can dry at room temperature.

These agents are widely used across various industries and in everyday items that require water and oil repellence. Common applications include enhancing touch panels with water and oil repellence, preventing fingerprints, serving as waterproofing sprays for textiles like silk and cotton, and providing protection for industrial components like bearings in mini motors and barriers in HDD fluid dynamic bearings. Additionally, they are applied for waterproofing materials such as wood and leather.
