The global Water Ring Pelletizers market size is predicted to grow from US\$ 247 million in 2025 to US\$ 361 million in 2031; it is expected to grow at a CAGR of 6.5% from 2025 to 2031.

In water ring pelletizers, the cooling and transport medium, water, does not come into contact with the die plate. The circulating knives cut the melt strands and fling the hot molten pellets into the circulating water ring. The water flow conveys the pellets out of the pelletizer hood.
