Waterproof heat-sealable plastic-free coated paper is based on white kraft paper or other types of paper, and a very thin layer of waterproof and anti-seepage coating with high barrier properties is coated on its surface through a coating process. This coating not only gives the paper excellent waterproof and oil-proof properties, but also enables it to achieve adhesion between coated surfaces by heating under certain conditions, achieving a heat-sealing effect similar to that of plastic film. This coating material usually does not contain plastic components, is biodegradable and recyclable, and meets environmental protection requirements.
