Waxed polyester thread is a type of thread that is commonly used in sewing and crafting projects. It is made from polyester fibers that are coated or treated with wax to improve its durability, strength, and sewing performance. The wax coating on the thread serves several purposes. First, it reduces friction and tangling, making it easier to sew with. The wax also adds strength and helps prevent the thread from breaking or fraying during use. Additionally, the wax coating provides some level of water resistance, which can be advantageous for certain applications.
