## Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

The global Weapon Lights market size is projected to grow from US\$ million in 2022 to US\$ million in 2029; it is expected to grow at a CAGR of % from 2023 to 2029.

Two predictable changes occurred in the weapon-mounted light market in the last decade or so. First, they've gotten smaller. Second, bigger lights have gotten absurdly powerful. A modern full-size weapon-mounted light is capable of packing 1,000 lumens and over 10,000 candela. Beams wide and powerful enough to fill a room with light, or to act as a searchlight outdoors, are now common.
