Wet Abrasion Scrub Testers, also known simply as scrub testers, are specialized laboratory instruments used to evaluate the abrasion and wear resistance of various materials, coatings, paints, and surface finishes. These testers simulate the process of scrubbing or rubbing, typically encountered in real-world situations such as cleaning, washing, or general wear and tear.

Automation is becoming increasingly common in Wet Abrasion Scrub Testers. Robotic systems are being integrated to ensure precise and consistent scrubbing motion and reduce the potential for human error. Automated systems can also conduct tests for extended durations, allowing for more thorough evaluation of material durability.
