According to the report, one of the major drivers for this market is Stabilization of global crude oil prices. Owing to the weak global crude oil market during 2014 and 2016, the construction sector in oil producing countries came to a halt. The Middle East countries, such as Saudi Arabia, Kuwait, and Oman, experienced a downturn in the growth of the construction sector. With the overall global economy in a downslide during this period, the construction and mining sectors faced difficult times, resulting in various projects, including government projects, being temporarily put on hold.
