The global Wheeled Robot market size is predicted to grow from US\$ 272 million in 2025 to US\$ 463 million in 2032; it is expected to grow at a CAGR of 8.1% from 2026 to 2032.

In 2024, global Wheeled Robot production reached approximately 8645 units, with an average global market price of around US\$ 30k per unit. Wheeled robots are a type of robot that uses wheels as its main mode of movement. They are widely used in industries such as industry, logistics, services, agriculture, and scientific research due to their efficient and flexible movement characteristics. Compared with tracked and legged robots, wheeled robots are more efficient in moving on flat or regular surfaces, and can achieve fast, stable straight-line driving and precise directional control. Its core structure usually includes a drive system, a sensor system, a control system, and a power module. Through the coordinated work of these modules, functions such as path planning, obstacle avoidance, and task execution are achieved.

The wheeled robot market is experiencing rapid expansion, driven by strong demand from e-commerce logistics, smart manufacturing, and warehouse automation. Compared to tracked or crawler robots, wheeled robots are more compact, relatively low-cost, and highly flexible, making them suitable for flat surfaces. They are particularly popular in warehouse handling, workshop material circulation, and distribution. Mainstream products in the current market include AGVs (automated guided vehicles) and AMRs (autonomous mobile robots). AMRs are experiencing the fastest growth, thanks to their lack of fixed tracks and their ability to autonomously navigate and dispatch using lidar and vision systems, making them suitable for diverse production and logistics environments. Regionally, Asia-Pacific countries such as China, Japan, and South Korea dominate production and deployment, while the European and American markets focus more on high-end applications and system integration, resulting in higher average unit prices and added value services.
