The global Whole Slide Imaging in Pathology market size is predicted to grow from US\$ 424 million in 2025 to US\$ 880 million in 2032; it is expected to grow at a CAGR of 11.2% from 2026 to 2032.

The adoption of digital pathology, including whole slide imaging, has been on the rise. Pathology laboratories and healthcare institutions are increasingly transitioning from traditional glass slide-based workflows to digital platforms. This shift aims to enhance collaboration, streamline workflows, and improve diagnostic accuracy.

WSI facilitates telepathology, allowing pathologists to view and analyze digital slides remotely. This trend has become especially relevant in situations where access to pathology expertise is limited. Telepathology supports remote consultations, second opinions, and collaborative discussions among pathologists.
