Abstracts

The global Wide Neck PET Blow Molding Machine market size is predicted to grow from US$ 144 million in 2025 to US$ 184 million in 2032; it is expected to grow at a CAGR of 3.6% from 2026 to 2032.

In 2024, global production of wide-neck PET blow molding machines will reach 8,163 units, with an average selling price of US$17,430 per unit.

A wide-neck PET blow molding machine is a type of blow molding equipment specifically designed for producing wide-mouth polyethylene terephthalate (PET) bottles. Its core feature is a large bottle neck diameter (typically ?50mm), making it suitable for large-volume containers or those requiring rapid filling, such as beverage bottles and edible oil bottles. This equipment utilizes a biaxial orientation blow molding process, which aligns the PET molecular chains through longitudinal and transverse stretching, significantly improving the bottle's mechanical strength, transparency, and airtightness. During the process, the preform is softened by heating, then stretched longitudinally within the mold by stretch rods while simultaneously inflated laterally by compressed air. Finally, it cools and solidifies into the finished bottle. The equipment is typically equipped with a sophisticated temperature control system and air pressure regulator to ensure uniform heating of the preform, a controllable stretch ratio (3.5–4.2 radially, 2.8–3.1 axially), and compliance with the hygiene standards and performance requirements of different bottle types (e.g., cold-fill and hot-fill).

The upstream of the wide-neck PET blow molding machine industry chain focuses on key materials and core components (PET resin, mold steel, servo motors, and control systems). Representative companies include BASF, DuPont, Daido Steel, Siemens, and ABB. The midstream involves blow molding machine manufacturing and mold

development (Krones, Sidel, SIPA, Tech-Long, Newamstar, and Tongda Machinery), focusing on high-speed and high-efficiency (eight-cavity/ten-cavity models) and precision control technologies. The downstream market encompasses the food and beverage sector (large-capacity water/beverage bottles, cooking oil drums), daily chemical packaging (shampoo/shower gel bottles), and the pharmaceutical sector (wide-mouth medicine/reagent bottles).
