The report requires updating with new data and is sent in 48 hours after order is placed.

The global Wifi IP Camera market size is predicted to grow from US\$ 3800 million in 2025 to US\$ 7106 million in 2031; it is expected to grow at a CAGR of 11.0% from 2025 to 2031.

IP Camera is a type of digital video camera commonly employed for surveillance, and which, unlike analog closed circuit television (CCTV) cameras, can send and receive data via a computer network and the Internet.

Wi-Fi is a technology that can wirelessly connect terminals such as personal computers and handheld devices (such as PDAs and mobile phones) to each other.

The birth of Wifi IP Camera has greatly satisfied some villas, homes, shops, etc., as well as some places where wiring is not very good. It completely eliminates the complexity of wiring construction, and really turns engineering into products. Compared with wired cameras, Wifi IP Camera is easier to install and set up. But they usually require a subscription to take full advantage of them, which may include cloud storage.

Globally, the main manufacturers of Wifi IP Camera include Arlo Technologies, Motorola and Honeywell, etc. Arlo Technologies has the largest market share of nearly 20%. Asia Pacific is the largest market, holds a share over 50%.
