The report requires updating with new data and is sent in 48 hours after order is placed.

The global Wind Power Coating market size is predicted to grow from US\$ 403 million in 2025 to US\$ 511 million in 2031; it is expected to grow at a CAGR of 4.0% from 2025 to 2031.

The erosion and corrosion of wind towers and blades is not a surprise given the variety of and often harsh environmental conditions encountered at sea and on land. If not protected, this erosion and corrosion will reduce the structure's strength, reliability, life span and, ultimately, its economic value. So coating plays an important role in protecting blades, tower and other components from environment.

Global core wind power paint manufacturers include Hempel, AkzoNobel and PPG etc. The top 3 companies hold a share about 61%. Asia is the largest sales market, with a sales market share in value about 55%, followed by Europe with the share about 21%.

In terms of product, polyurethane coating is the largest segment with a sales market share in value about 57%. And in terms of application, the largest application is onshore towers with a sales market share in value about 50%.
